

**Table 8c: Total, threatened, and EX & EW endemic species in each country (totals by taxonomic group): INVERTEBRATES**

Total number of endemic and threatened endemic invertebrate species recorded for each country for comprehensively assessed groups only.

**Endemics** = species that are known to occur naturally within one country only.

**Threatened** = species assessed in any of the three threatened Red List categories (Critically Endangered, Endangered, Vulnerable)

**NOTE:** Up until 2024-1, Table 8c included Cone Snails. While the genus *Conus* was comprehensively assessed in previous Red List, recent taxonomic revisions have moved species into different genera within the family CONIDAE. Since not all species within CONIDAE have been assessed, the cone snails have been removed from Table 8c. However, a reassessment is underway and these species will return to Table 8c when that process is completed.
