

Royle's Pika (*Ochotona roylei*)

Figure S1. Graphical representation of the conservation metrics based on the Green Scores. Key: Vertical arrows represent the four conservation metrics: L – Conservation Legacy (may not appear if current and counterfactual states are the same); D – Conservation Dependence (may not appear if current and future-without-conservation states are the same); G – Conservation Gain (may not appear if current and future-with-conservation states are the same); P – Recovery Potential (may not appear if current and potential states are the same). Horizontal red dashed line represents the Current Green Score. Solid black line: observed change in the Green Score of the species (ignore it if "Former" state is not specified). Long-dashed black line: (counterfactual) past change expected in the absence of past conservation efforts. Dashed black lines: future scenarios of change expected with and without current and future conservation efforts. Dotted black line: long-term potential change expected with future conservation innovation and efforts.

Table S1. Conservation Actions ([list of action codes](#))

Spatial unit	Name	Past actions (no longer occurring)	Current actions	Actions planned within 10 years	Actions that could be implemented in the long-term aspiration scenario
SU 1	West of Kali Gandaki River	None	None	None	1.1; 1.2; 2.1; 4.3; 5.1.4; 5.2
SU 2	East of Kali Gandaki River	None	None	None	1.1; 1.2; 2.1; 4.3; 5.1.4; 5.2

Table S2. Threats (list of [threat codes](#))

Spatial unit	Name	Past threats (no longer occurring)	Current threats	Threats expected to emerge or continue over next 10 years	Threats that would be relevant in the long-term aspiration scenario
SU 1	West of Kali Gandaki River	None	1.3; 9.4; 10.3; 11.2; 11.3	1.3; 9.4; 10.3; 11.1; 11.2; 11.3	1.3; 7.1.3; 7.3; 9.4; 10.3; 11.1; 11.2; 11.3
SU 2	East of Kali Gandaki River	None	1.3; 9.4; 10.3; 11.2; 11.3	1.3; 9.4; 10.3; 11.1; 11.2; 11.3	1.3; 7.1.3; 7.3; 9.4; 10.3; 11.1; 11.2; 11.3

Appendix 1. Assessor Self-Review

- 1. Disclose any potential conflicts of interest, which could bias the assessment.**

None.

- 2. Is there any discrepancy between this assessment and the Red List assessment for the species? If so, comment on the likely reason for this discrepancy.**

The latest Red List assessment was done in 2016 and since then more information has been published related the species' vulnerability to climate change. Hence, we have added all latest relevant information in this assessment.

- 3. Review the impact that you assigned to the various threats and conservation actions. Would the trajectory of the species be very different if other choices were made? If so, review your justification for these choices. If appropriate, widen the bounds on tabs 4 and 5-8 (change the lower and upper plausible values) to reflect the uncertainty introduced by the possibility of these other choices. How, if at all, did this review question cause this assessment to change? If no changes were needed, please write "no changes".**

No changes.
