

Green Status of Species: Supplementary information

Sehuencas Water Frog (*Telmatobius yuracare*)

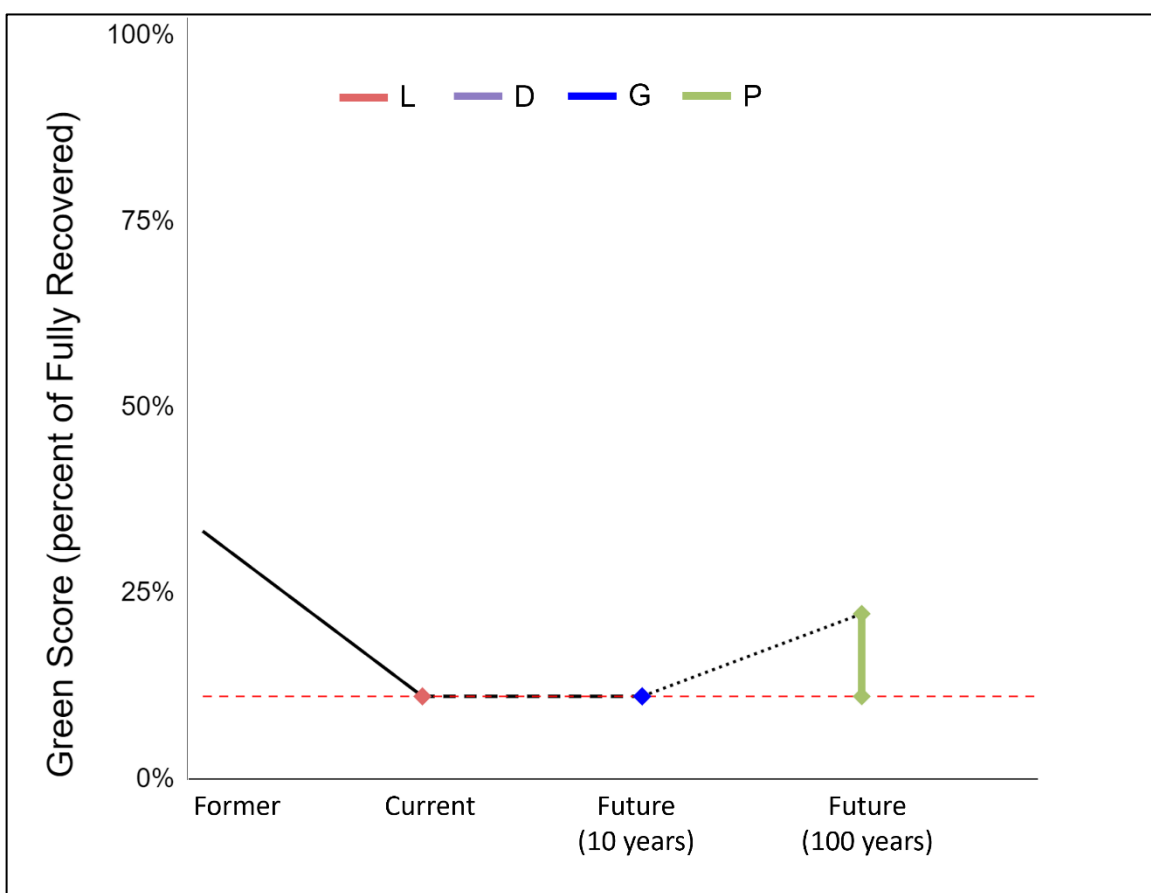

Figure S1. Graphical representation of the conservation metrics based on the Green Scores. Key: Vertical arrows represent the four conservation metrics: L – Conservation Legacy (may not appear if current and counterfactual states are the same); D – Conservation Dependence (may not appear if current and future-without-conservation states are the same); G – Conservation Gain (may not appear if current and future-with-conservation states are the same); P – Recovery Potential (may not appear if current and potential states are the same). Horizontal red dashed line represents the Current Green Score. Solid black line: observed change in the Green Score of the species (ignore it if "Former" state is not specified). Long-dashed black line: (counterfactual) past

change expected in the absence of past conservation efforts. Dashed black lines: future scenarios of change expected with and without current and future conservation efforts. Dotted black line: long-term potential change expected with future conservation innovation and efforts.

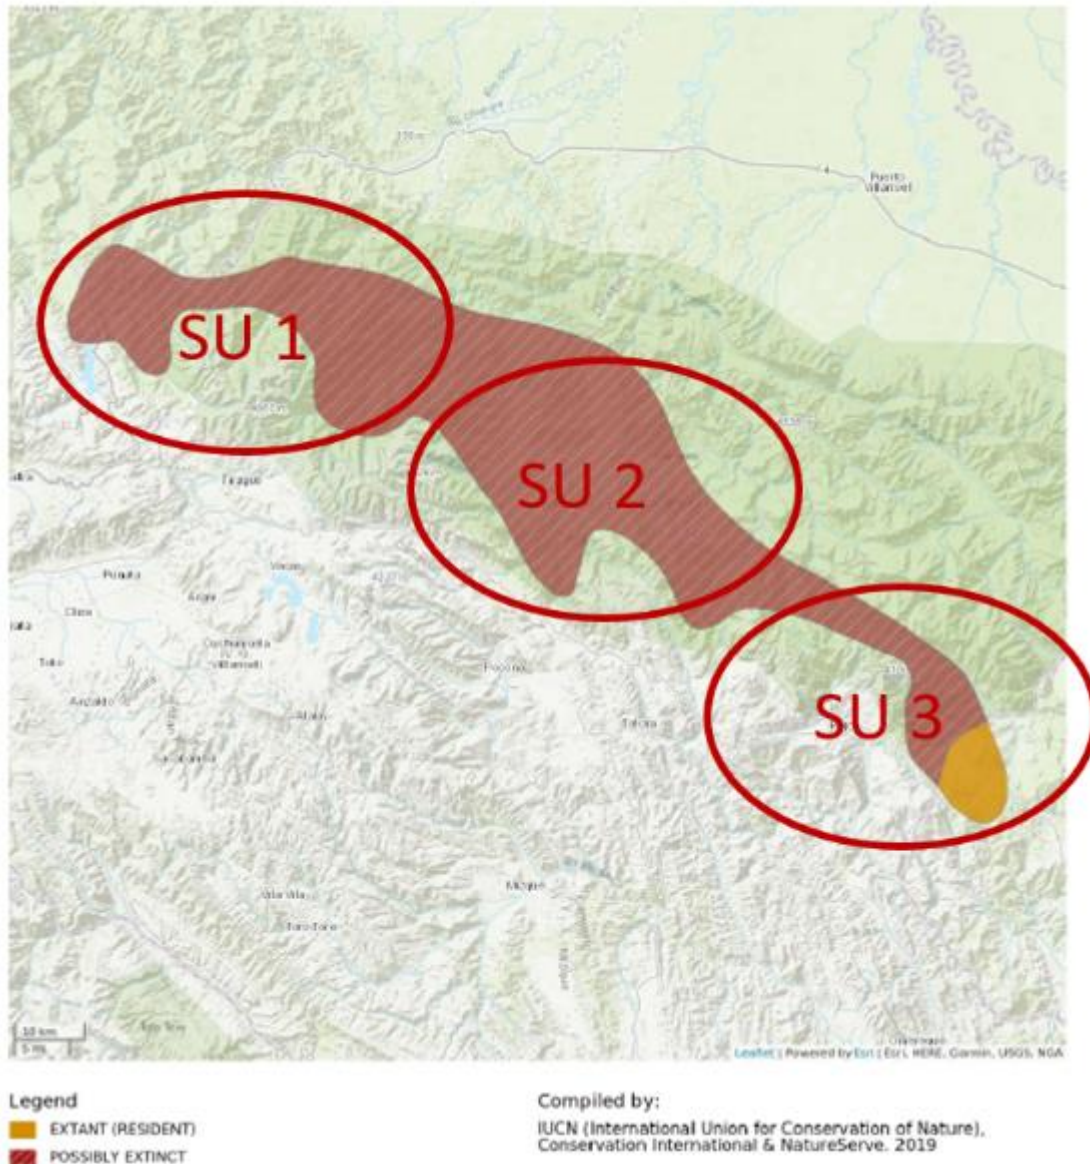

Figure S2. The species' range map is based on all historical and recent records (IUCN SSC Amphibian Specialist Group 2020). The map represents the indigenous range, and we do not predict any expected additional range. The relative location of the three spatial units is indicated.

Table S1. Conservation Actions ([list of action codes](#)).

Classification	Full Description	Past actions (no longer occurring)	Current actions	Actions planned within 10 years	Actions that could be implemented in the long-term aspiration scenario
1.1	1.1 Land/water protection: Site/area protection	Northern Yungas of Carrasco National Park, Central Yungas of Carrasco National Park, Southern Yungas of Carrasco and Amboró National Park.			
1.2	1.2 Land/water protection: Resource & habitat protection	Northern Yungas of Carrasco National Park, Central Yungas of Carrasco National Park, Southern Yungas of Carrasco and Amboró National Park.			
2.1	2.1 Land/water management: Site/area management		Northern Yungas of Carrasco National Park, Central Yungas of Carrasco National Park, Southern Yungas of Carrasco and Amboró National Park.	Northern Yungas of Carrasco National Park, Central Yungas of Carrasco National Park, Southern Yungas of Carrasco and Amboró National Park.	Northern Yungas of Carrasco National Park, Central Yungas of Carrasco National Park, Southern Yungas of Carrasco and Amboró National Park.
2.2	2.2 Land/water management:			Northern Yungas of Carrasco National Park.	Northern Yungas of Carrasco National Park,

Classification	Full Description	Past actions (no longer occurring)	Current actions	Actions planned within 10 years	Actions that could be implemented in the long-term aspiration scenario
	Invasive/problematic species control			Park, Central Yungas of Carrasco National Park.	Central Yungas of Carrasco National Park.
2.3	2.3 Land/water management: Habitat & natural process restoration			Northern Yungas of Carrasco National Park, Central Yungas of Carrasco National Park, Southern Yungas of Carrasco and Amboró National Park.	Northern Yungas of Carrasco National Park, Central Yungas of Carrasco National Park, Southern Yungas of Carrasco and Amboró National Park.
3.1.1	3.1.1 Harvest management				
3.1.2	3.1.2 Trade management				
3.1.3	3.1.3 Limiting population growth				
3.2	3.2 Species recovery			Northern Yungas of Carrasco National Park, Central Yungas of Carrasco National Park, Southern Yungas of Carrasco and Amboró National Park.	Northern Yungas of Carrasco National Park, Central Yungas of Carrasco National Park, Southern Yungas of Carrasco and Amboró National Park.
3.3.1.	3.3.1. Species re-introduction: Reintroduction			Southern Yungas of Carrasco and	Southern Yungas of Carrasco and Amboró National Park.

Appendix 1: Assessor Self-Review

- 1. Disclose any potential conflicts of interest which could bias the assessment.**

None

- 2. Is there any discrepancy between this assessment and the Red List assessment for the species? If so, comment on the likely reason for this discrepancy.**

No

- 3. Review the impact that you assigned to the various threats and conservation actions. Would the trajectory of the species be very different if other choices were made? If so, review your justification for these choices. If appropriate, widen the bounds on tabs 4 and 5-8 (change the lower and upper plausible values) to reflect the uncertainty introduced by the possibility of these other choices. How, if at all, did this review question cause this assessment to change? If no changes were needed, please write "no changes".**

No Changes. All data used in this assessment were based on existing information on the species. If new information becomes available in the future, such as the presence of the species in currently absent units, a new assessment should be conducted.
